WorldView and Homecare Homebase Deepen Their Partnership to Better Serve Home Health and Hospice Agencies

Partnership Maximizes Efficiency for Home Care Agencies Through Document Management Capabilities and Workflow Automation

DALLAS and OMAHA, Neb., September 27, 2022 – [Homecare Homebase](#)SM (HCHB), the nation’s leading software for home-based care, together with enterprise content management solution [WorldView](#), announced a new collaboration designed to maximize efficiency for home health and hospice agencies.

Connected since 2013, WorldView and Homecare Homebase integrate to provide agencies with the tools they need to streamline workflows and customize automation for order tracking, patient intake, medical records management, and more. Through the collaboration, agencies can easily track orders using barcode or text recognition regardless of the original source; seamlessly monitor staff productivity with real-time dashboards and data analytics; and automate data entry all while staying organized with digital annotations, notes, and stamps.

“Our partnership with WorldView helps agencies leverage the power of technology to streamline operations in an increasingly demanding environment,” said Chip Sloan, Vice President of Strategic Partnerships for HCHB. *“Together, our solutions enable home health organizations to reduce overhead and maintain staffing levels while serving even more clients.”*

Jared Robey, WorldView’s Vice President of Sales, added: *“We’re grateful to be a Homecare Homebase preferred partner and to support their home-based care delivery*

efforts. We're excited to further integrate our products and align our vision to enhance agencies' ability to provide better care by streamlining medical records processes.”
